

StudyVarsity

We are bringing the best of personal training right here in UAE, are you ready to ride?

Education - evergreen industry

Recession Proof Industry

Education is the industry which never suffers from recession. In fact, research shows that people seek to study more in face of recession. So if you are in the education industry, you are already recession proof. If you are not and then this may be the chance you were looking for.

Personal Study Support

One of the recent trends in UAE is increasing demand for private teaching support for school going children. This has caused private tuition fees growing through the roof creating a great demand for a new service.

Problem is where do we get good teachers from?

Welcome to E-tutoring

The world is experiencing an explosive growth in e-tutoring. It is estimated that this market will grow to US\$102.8 billion by the year 2018. The challenge of technology has also been overcome and now training contents can be delivered online even on hand-held devices.

Problem is who will manage the course delivery?

Welcome to StudyVarsity

We at StudyVarsity is ready with a service addressing this great demand. We are ready with the infrastructure and training resource to deliver quality training wherever it is required.

Interactive Learning

We at StudyVarsity believe that there is no substitute for an interactive explanation of a subject. Our sessions combine both online and face to face training. This makes a great learning and business sense. The students at StudyVarsity will get online access to tutors teaching real-time and these teachers will come over to

UAE once every eight weeks and face the students in doubt-clearing sessions.

Training Portfolio

We have a wide training portfolio. Starting from class ten board examination upto professional accounting examinations, we have them all. We will keep on expanding the portfolio in coming days.

The Business Model

The way StudyVarsity will follow the Franchisee model for growth. We will partner with a **master franchisee** who will be responsible for the growth of further centres in the region. The **franchisee centres** will be responsible for providing on-line and physical contact sessions. We will provide the training resource and contents while the franchisee will provide physical infrastructure and acquire students.

What you need?

What you need is space to accommodate between 15 to 20 students and necessary infrastructure to support both online live and offline live contact sessions.

Who are we?

South Asian Management Technologies Foundation is focused on training and inherits the legacy of a group operating for 25 years. We have been focusing on continuing education for professionals and are accredited with National Association of State Board of Accountancy, USA (NASBA), the apex consortium for CPA qualification.

We are now diversifying with learning support for school and University level students.

Contact Us

Feel free to drop a line to knowledge@south-asian.org and we will take it up from there. We are happy to call you and even meet you in person, just let us know your preference.
